for

SPECIAL ISSUE OF GEOHORIZONS

“Unconventional Exploration in Indian basins”

Indian basins, including onshore and offshore, have always been challenging and always known to be providing learning experiences for geoscientists. Unconventional exploration in Indian Basins is gaining movement in the recent years as the quest for oil & gas reached to deeper and unconventional reservoirs like **sub basalt, basement, HPHT, shale gas and ultra-shallow to deep to ultra-deep waters** in offshore. As the companies are offering various technologies and the cost has become a concern as the oil prices are dipping to the bottom, judicious selection of technology depending upon the seriousness of the geological problem and the techno-economic scenario of the field is to be explored.

In the presenting paper, authors need to address the issues related to the Indian scene and the possible solution to the problems envisaged to be encountered.

Last date for submission of papers to the special issue has been extended by 31.3.2015. Guidelines to be followed for submission of paper are as published in GEOHORIZONS-January 2015 issue. **Papers are to be sent to the email address spgindia@rediffmail.com. With a caption “Special issue-GEOHORIZONS”.**
