

## From the Editor's Desk

My fellow geoscientists,

SPG India is organizing its 13th biennial conference at Kochi, Kerala, India from Feb 23-25, 2020. As a part of the SPG team, it is my pleasure to invite you to be a part of this grand occasion and eagerly waiting to meet you all.

SPG India, in association with SEG and EAGE, had organized twin workshop on Foothill Imaging, and Sub-basalt Imaging during February 2019. Out of several works presented in the workshop, 6 quality works related to sub-basalt imaging, have been selected for publication in this issue of GEOHORIZONS for wider circulation among geoscientists.

SPG team being too occupied with the preparation of the conference Kochi2020, responsibility of editing this issue was shouldered by Shri Satinder Chopra, an eminent geoscientist and founding member of the SPG India. Editorial team of Geohorizons is thankful to the efforts put by our esteemed guest editor.

I hope this issue will prove to be helpful by improving our understanding in the domain of sub-basalt imaging and will add value to the technical know-how of our fellow geoscientists.

With warm regards,

With warm regards,

  
(C.B. Yadava)
