

SPG, India Organized a Technical Lecture on 28th August at Dehradun

A technical lecture was organized by SPG, India on “Low Frequency Passive Seismic” on 28th August, 2019 at KDMIPE Mini Auditorium, Dehradun. The lecture was delivered by Shri U S D Pandey, Ex-ED, ONGC.

The lecture highlighted through reviews on the recent

development of Low-Frequency Passive Seismic technique and its success all over the world. Case studies from Indian basins were also discussed and what are the limitations and future implication of Low Frequency Seismic were deliberated upon.

The lecture session was attended by the members of SPG, Dehradun and other Geoscientists of KDMIPE, GEOPIC and & Frontier Basins. The lecture was also attended by group of trainee students from various institutes. The lecture well appreciated by all the participants and praised by one and all for its contents, simplicity and thoughtful inputs provided by the presenter. During the interactive question session participants asked various questions related to implication of passive seismic.

Earlier, Shri Pradipta Mishra, President, SPG-India gave the welcome speech followed by welcome of the presenter with bouquet of flowers.

The vote of thanks was given by Shri Paramjit Singh Bhamra, Joint Secretary, SPG-India.
