

# Letter to the Editor

Dear Editor,

Editorial Board and authors deserve thanks for providing a rich milieu of informative technical articles in July 2009 issue of Geohorizons. Brief comparison of various migration algorithms was the dish I liked most. A review article on basic principle of a geophysical subject may be introduced in the periodical.

The article on Integration of gravity, magnetic and seismic in Indian Offshore will be useful for the geoscientists exploring new prospects in this part of India.

The author of the Geophuzzle which provided a good refresh of memory with the questions on various subjects of Earth science and general knowledge deserves special appreciation.

Please note that the name of Mita Rajaram, Author of “What’s new in interpretation of magnetic data?” has been mistyped as Mita Majumdar in the Editorial.

**Lavendra Kumar,**  
SPIC, ONGC, Panvel

(Editor writes: My profuse apologies to Dr. Mita Majumdar, her husband and readers for inadvertently using the maiden name of Dr. Mita Rajaram).
