

# Participation of NGRI in the 12<sup>th</sup> Biennial International Conference and Exposition” at Jaipur 2017 hosted by SPG-India

Society of Petroleum Geophysicists, India (SPG) organized its 12th Biennial International Conference and Exposition at Jaipur, India during 17 to 19 November, 2017. As a major event, in Asian region, it provided a very good platform for advanced discussions and interactions about the issues, progresses and technological applications of geophysics in petroleum industry. It also focussed on promoting the Industry-Academia interaction by making young scholars and graduates as an integral part of the conference. The theme of the conference “Energy Through Synergy” aptly aims for development of energy sector by the collaboration of advancements in several geoscience sectors and other sources of energy. Students from the CSIR-National Geophysical Research Institute, Hyderabad became a part of this major

event through oral, poster presentation and various student activities such as Quiz competition and Industry-Academia interaction programmes.

Across various sessions there were four poster presentations and two oral paper presentations by the students of NGRI. Our institute also displayed the various research activities carried out at NGRI through the exhibition stall during the conference. As a part of student activity, our institute was also represented by two students from the NGRI Student Chapter. A total of 12 teams participated in the Quiz competition.
